## Seminar Outline

- **Introduction**
- *Fluid Flow Fundamentals*
- *Flowmeter Technology*
- *Flowmeter Performance*
- *Consumer Guide*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

8

---

---

---

---

---

---

---

---

## Introduction

- *Working Definition of a Process*
- *Why Measure Flow?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

9

---

---

---

---

---

---

---

---

## Working Definition of a Process

- *A process is anything that changes*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

10

---

---

---

---

---

---

---

---

## Why Measure Flow?

- *Flow measurements provide information about the process*
- *The information that is needed depends on the process*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

11

---

---

---

---

---

---

---

---

## Why Measure Flow?

- *Custody transfer*
  - *Measurements are often required to determine the total quantity of fluid that passed through the flowmeter for billing purposes*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

12

---

---

---

---

---

---

---

---

## Why Measure Flow?

- *Monitor the process*
  - *Flow measurements can be used to ensure that the process is operating satisfactorily*

13

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Why Measure Flow?

- *Improve the process*
  - *Flow measurements can be used for heat and material balance calculations that can be used to improve the process*

14

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Why Measure Flow?

- *Monitor a safety parameter*
  - *Flow measurements can be used to ensure that critical portions of the process operate safely*

15

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Seminar Outline

- *Introduction*
- ***Fluid Flow Fundamentals***
- *Flowmeter Technology*
- *Flowmeter Performance*
- *Consumer Guide*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

16

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- ***Temperature***
- *Pressure*
- *Density and Fluid Expansion*
- *Types of Flow*
- *Inside Pipe Diameter*
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

17

---

---

---

---

---

---

---

---

## Temperature

- *Measure of relative hotness/coldness*
  - *Water freezes at 0°C (32°F)*
  - *Water boils at 100°C (212°F)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

18

---

---

---

---

---

---

---

---

## Temperature

- *Removing heat from fluid lowers temperature*
  - *If all heat is removed, absolute zero temperature is reached at approximately  $-273^{\circ}\text{C}$  ( $-460^{\circ}\text{F}$ )*

19

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Temperature

- *Absolute temperature scales are relative to absolute zero temperature*
  - *Absolute zero temperature =  $0\text{ K}$  ( $0^{\circ}\text{R}$ )*
    - *Kelvin =  $^{\circ}\text{C} + 273$*
    - *Rankin =  $^{\circ}\text{F} + 460$*

20

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Temperature

- *Absolute temperature is important for flow measurement*

21

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Temperature

373 K = 100°C    672°R = 212°F  
 273 K = 0°C    460°R = 0°F  
 0 K = -273°C    0°R = -460°F

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

22

---

---

---

---

---

---

---

---

## Temperature

**Problem**

- *The temperature of a process increases from 20°C to 60°C. For the purposes of flow measurement, by what percentage has the temperature increased?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

23

---

---

---

---

---

---

---

---

## Temperature

- *It is tempting to answer that the temperature tripled (60/20), but the ratio of the absolute temperatures is important for flow measurement*
  - $(60+273)/(20+273) = 1.137$
  - 13.7% increase

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

24

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- **Pressure**
- *Density and Fluid Expansion*
- *Types of Flow*
- *Inside Pipe Diameter*
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

25

---

---

---

---

---

---

---

---

## Pressure

- *Pressure is defined as the ratio of a force divided by the area over which it is exerted ( $P=F/A$ )*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

26

---

---

---

---

---

---

---

---

## Pressure

### **Problem**

- *What is the pressure exerted on a table by a 2 inch cube weighing 5 pounds?*
  - $(5 \text{ lb}) / (4 \text{ inch}^2) = 1.25 \text{ lb/in}^2$
  - *If the cube were balanced on a 0.1 inch diameter rod, the pressure on the table would be 636 lb/in<sup>2</sup>*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

27

---

---

---

---

---

---

---

---

## Pressure

- *Atmospheric pressure is caused by the force exerted by the atmosphere on the surface of the earth*
  - *2.31 feet WC / psi*
  - *10.2 meters WC / bar*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

28

---

---

---

---

---

---

---

---

## Pressure

- *Removing gas from a container lowers the pressure in the container*
  - *If all gas is removed, absolute zero pressure (full vacuum) is reached at approximately -1.01325 bar (-14.696 psig)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

29

---

---

---

---

---

---

---

---

## Pressure

- *Absolute pressure scales are relative to absolute zero pressure*
  - *Absolute zero pressure*
    - *Full vacuum = 0 bar abs (0 psia)*
    - *bar abs = bar + 1.01325*
    - *psia = psig + 14.696*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

30

---

---

---

---

---

---

---

---

## Pressure

The diagram illustrates the relationship between different pressure measurement scales. A horizontal dashed line represents the 'Atmosphere' level. Below it, a solid line represents 'Absolute Zero'. An upward arrow from Absolute Zero to the Atmosphere line is labeled 'Vacuum'. Another upward arrow from the Atmosphere line to a higher level is labeled 'Absolute'. A third upward arrow from the Atmosphere line to a level below the Absolute level is labeled 'Gauge'. A double-headed vertical arrow between the Absolute and Gauge levels is labeled 'Differential'.

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)
31

---

---

---

---

---

---

---

---

## Pressure

- *Absolute pressure is important for flow measurement*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)
32

---

---

---

---

---

---

---

---

## Pressure

**Problem**

- *The pressure of a process increases from 1 bar to 3 bar. For the purposes of flow measurement, by what percentage has the pressure increased?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)
33

---

---

---

---

---

---

---

---

## Pressure

- *It is tempting to answer that the pressure tripled (3/1), but the ratio of the absolute pressures is important for flow measurement*
  - $(3+1.01325)/(1+1.01325) = 1.993$
  - 99.3% increase

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

34

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- ***Density and Fluid Expansion***
- *Types of Flow*
- *Inside Pipe Diameter*
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

35

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Density is defined as the ratio of the mass of a fluid divided its volume*  
( $\rho = m/V$ )

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

36

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Specific Gravity of a liquid is the ratio of its operating density to that of water at standard conditions*
  - $SG = \rho_{\text{liquid}} / \rho_{\text{water at standard conditions}}$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

37

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- *What is the density of air in a 3.2 ft<sup>3</sup> filled cylinder that has a weight of 28.2 and 32.4 pounds before and after filling respectively?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

38

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *The weight of the air in the empty cylinder is taken into account*
  - $Mass = (32.4 - 28.2) + (3.2 \cdot 0.075)$   
 $= 4.44 \text{ lb}$
  - $Volume = 3.2 \text{ ft}^3$
  - $Density = 4.44 / 3.2 = 1.39 \text{ lb/ft}^3$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

39

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *The density of most liquids is nearly unaffected by pressure*
- *Expansion of liquids*
  - $V = V_0 (1 + \beta \cdot \Delta T)$
  - $V$  = new volume
  - $V_0$  = old volume
  - $\beta$  = cubical coefficient of expansion
  - $\Delta T$  = temperature change

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

40

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- *What is the change in density of a liquid caused by a 10°C temperature rise where  $\beta$  is 0.0009 per °C ?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

41

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Calculate the new volume*
  - $V = V_0 (1 + 0.0009 \cdot 10) = 1.009 V_0$
  - *The volume of the liquid increased to 1.009 times the old volume, so the new density is (1/1.009) or 0.991 times the old density*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

42

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Expansion of solids*
  - $V = V_0 (1 + \beta \cdot \Delta T)$ 
    - where  $\beta = 3 \cdot \alpha$
    - $\alpha$  = linear coefficient of expansion
- *Temperature coefficient*
  - *Stainless steel temperature coefficient is approximately 0.5% per 100°C*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

43

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- *What is the increase in size of metal caused by a 50°C temperature rise where the metal has a temperature coefficient of 0.5% per 100°C ?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

44

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Calculate the change in size*
  - $(0.5 \cdot 50) = 0.25\%$
  - *Metals (such as stainless steel) can exhibit significant expansion*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

45

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- Boyle's Law states the the volume of an ideal gas at constant temperature varies inversely with absolute pressure
  - $V = K / P$

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- New volume can be calculated
  - $V = K / P$
  - $V_0 = K / P_0$
- Dividing one equation by the other yields
  - $V/V_0 = P_0 / P$

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- How is the volume of an ideal gas at constant temperature and a pressure of 28 psig affected by a 5 psig pressure increase?

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- Calculate the new volume

- $V/V_0 = (28+14.7) / (28+5+14.7) = 0.895$

- $V = 0.895 V_0$

- Volume decreased by 10.5%

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- Charles' Law states the the volume of an ideal gas at constant pressure varies directly with absolute temperature

- $V = K \cdot T$

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- New volume can be calculated

- $V = K \cdot T$

- $V_0 = K \cdot T_0$

- Dividing one equation by the other yields

- $V/V_0 = T/T_0$

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- How is the volume of an ideal gas at constant pressure and a temperature of  $15^{\circ}\text{C}$  affected by a  $10^{\circ}\text{C}$  decrease in temperature?

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

52

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- Calculate the new volume
  - $V/V_0 = (273+15-10) / (273+15) = 0.965$
  - $V = 0.965 V_0$
  - Volume decreased by 3.5%

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

53

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- Ideal Gas Law combines Boyle's and Charles' Laws
  - $PV = nRT$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

54

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *New volume can be calculated*
  - $P \cdot V = n \cdot R \cdot T$
  - $P_0 \cdot V_0 = n \cdot R \cdot T_0$
- *Dividing one equation by the other yields*
  - $V/V_0 = (P_0/P) \cdot (T/T_0)$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

55

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

### Problem

- *How is the volume of an ideal gas at affected by a 10.5% decrease in volume due to temperature and a 3.5% decrease in volume due to pressure?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

56

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Calculate the new volume*
  - $V/V_0 = 0.895 \cdot 0.965 = 0.864$
  - $V = 0.864 V_0$
  - *Volume decreased by 13.6%*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

57

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *Non-Ideal Gas Law takes into account non-ideal behavior*
  - $PV = nRTZ$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

58

---

---

---

---

---

---

---

---

## Density and Fluid Expansion

- *New volume can be calculated*
  - $P \cdot V = n \cdot R \cdot T \cdot Z$
  - $P_0 \cdot V_0 = n \cdot R \cdot T_0 \cdot Z_0$
- *Dividing one equation by the other yields*
  - $V/V_0 = (P_0/P) \cdot (T/T_0) \cdot (Z/Z_0)$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

59

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- *Density and Fluid Expansion*
- **Types of Flow**
- *Inside Pipe Diameter*
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Types of Flow

- $Q = A \cdot v$ 
  - $Q$  is the volumetric flow rate
  - $A$  is the cross-sectional area of the pipe
  - $v$  is the average velocity of the fluid in the pipe

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

61

---

---

---

---

---

---

---

---

## Types of Flow

- *Typical Volumetric Flow Units ( $Q = A \cdot v$ )*
  - $ft^2 \cdot ft/sec = ft^3/sec$
  - $m^2 \cdot m/sec = m^3/sec$
  - gallons per minute (gpm)
  - liters per minute (lpm)
  - cubic centimeters per minute (ccm)

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

62

---

---

---

---

---

---

---

---

## Types of Flow

- $W = \rho \cdot Q$ 
  - $W$  is the mass flow rate
  - $\rho$  is the fluid density
  - $Q$  is the volumetric flow rate

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

63

---

---

---

---

---

---

---

---

## Types of Flow

- *Typical Mass Flow Units ( $W = \rho \cdot Q$ )*
  - $lb/ft^3 \cdot ft^3/sec = lb/sec$
  - $kg/m^3 \cdot m^3/sec = kg/sec$
  - *standard cubic feet per minute (scfm)*
  - *standard liters per minute (slpm)*
  - *standard cubic centimeters per minute (sccm)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Types of Flow

- $Q = A \cdot v$
- $W = \rho \cdot Q$
  
- $Q$      *volumetric flow rate*
- $W$      *mass flow rate*
- $v$      *fluid velocity*
- $\frac{1}{2} \rho v^2$      *inferential flow rate*

Spitzer and Boyes, LLC (+1.845.623.1830)

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- *Density and Fluid Expansion*
- *Types of Flow*
- ***Inside Pipe Diameter***
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Inside Pipe Diameter

- The *inside pipe diameter (ID)* is important for flow measurement
  - Pipes of the same size have the same outside diameter (OD)
    - Welding considerations
  - Pipe wall thickness, and hence its ID, is determined by its schedule

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

67

---

---

---

---

---

---

---

---

## Inside Pipe Diameter

- Pipe wall thickness increases with increasing pipe schedule
  - Schedule 40 pipes are considered “standard” wall thickness
  - Schedule 5 pipes have thin walls
  - Schedule 160 pipes have thick walls

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

68

---

---

---

---

---

---

---

---

## Inside Pipe Diameter

- Nominal pipe size
  - For pipe sizes 12-inch and smaller, the nominal pipe size is the approximate ID of a Schedule 40 pipe
  - For pipe sizes 14-inch and larger, the nominal pipe size is the OD of the pipe

Spitzer and Boyes, LLC (+1.845.623.1830)

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- *Density and Fluid Expansion*
- *Types of Flow*
- *Inside Pipe Diameter*
- **Viscosity**
- *Reynolds Number and Velocity Profile*
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

70

---

---

---

---

---

---

---

---

## Viscosity

- *Viscosity is the ability of the fluid to flow over itself*
- *Units*
  - *cP, cSt*
  - *Saybolt Universal (at 100°F, 210 °F)*
  - *Saybolt Furol (at 122°F, 210 °F)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

71

---

---

---

---

---

---

---

---

## Viscosity

- *Viscosity can be highly temperature dependent*
  - *Water*
  - *Honey at 40°F, 80°F, and 120°F*
  - *Peanut butter*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

72

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- *Density and Fluid Expansion*
- *Types of Flow*
- *Inside Pipe Diameter*
- *Viscosity*
- ***Reynolds Number and Velocity Profile***
- *Hydraulic Phenomena*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

73

---

---

---

---

---

---

---

---

## Velocity Profile and Reynolds Number

- *Reynolds number is the ratio of inertial forces to viscous forces in the flowing stream*
- $R_D = 3160 \cdot Q_{gpm} \cdot SG / (\mu_{cP} \cdot D_{in})$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

74

---

---

---

---

---

---

---

---

## Velocity Profile and Reynolds Number

- *Reynolds number can be used as an indication of how the fluid is flowing in the pipe*
- *Flow regimes based on  $R_D$* 
  - *Laminar* < 2000
  - *Transitional* 2000 - 4000
  - *Turbulent* > 4000

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

75

---

---

---

---

---

---

---

---

## Velocity Profile and Reynolds Number

- *Not all molecules in the pipe flow at the same velocity*
- *Molecules near the pipe wall move slower; molecules in the center of the pipe move faster*

76

---

---

---

---

---

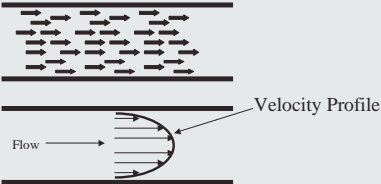

---

---

---

## Velocity Profile and Reynolds Number

- *Laminar Flow Regime*
  - *Molecules move straight down pipe*

77

---

---

---

---

---

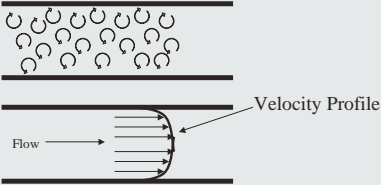

---

---

---

## Velocity Profile and Reynolds Number

- *Turbulent Flow Regime*
  - *Molecules migrate throughout pipe*

78

---

---

---

---

---

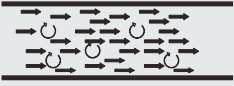

---

---

---

## Velocity Profile and Reynolds Number

- *Transitional Flow Regime*
  - *Molecules exhibit both laminar and turbulent behavior*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

79

---

---

---

---

---

---

---

---

## Velocity Profile and Reynolds Number

- *Many flowmeters require a good velocity profile to operate accurately*
- *Obstructions in the piping system can distort the velocity profile*
  - *Elbows, tees, fittings, valves*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

80

---

---

---

---

---

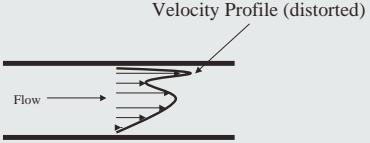

---

---

---

## Velocity Profile and Reynolds Number

- *A distorted velocity profile can introduce significant errors into the measurement of most flowmeters*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

81

---

---

---

---

---

---

---

---

## Velocity Profile and Reynolds Number

- *Good velocity profiles can be developed*
  - *Straight run upstream and downstream*
    - *No fittings or valves*
    - *Upstream is usually longer and more important*
  - *Flow conditioner*
  - *Locate control valve downstream of flowmeter*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

82

---

---

---

---

---

---

---

---

## Fluid Flow Fundamentals

- *Temperature*
- *Pressure*
- *Density and Fluid Expansion*
- *Types of Flow*
- *Inside Pipe Diameter*
- *Viscosity*
- *Reynolds Number and Velocity Profile*
- ***Hydraulic Phenomena***

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

83

---

---

---

---

---

---

---

---

## Hydraulic Phenomena

- *Vapor pressure is defined as the pressure at which a liquid and its vapor can exist in equilibrium*
  - *The vapor pressure of water at 100°C is atmospheric pressure (1.01325 bar abs) because water and steam can coexist*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

84

---

---

---

---

---

---

---

---

## Hydraulic Phenomena

- *A saturated vapor is in equilibrium with its liquid at its vapor pressure*
  - *Saturated steam at atmospheric pressure is at a temperature of 100°C*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

85

---

---

---

---

---

---

---

---

## Hydraulic Phenomena

- *A superheated vapor is a saturated vapor that is at a higher temperature than its saturation temperature*
  - *Steam at atmospheric pressure that is at 150°C is a superheated vapor with 50°C of superheat*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

86

---

---

---

---

---

---

---

---

## Hydraulic Phenomena

- *Flashing is the formation of gas (bubbles) in a liquid after the pressure of the liquid falls below its vapor pressure*
  - *Reducing the pressure of water at 100°C below atmospheric pressure (say 0.7 bar abs) will cause the water to boil*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

87

---

---

---

---

---

---

---

---

## Hydraulic Phenomena

- *Cavitation is the formation and subsequent collapse of gas (bubbles) in a liquid after the pressure of the liquid falls below and then rises above its vapor pressure*
  - *Can cause severe damage in pumps and valves*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

## Differential Pressure Flowmeter Technology

- *Principle of Operation*
- *Primary Flow Elements*
- *Transmitter Designs*
- *Installation*
- *Accessories*
- *Other Flowmeter Technologies*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

100

---

---

---

---

---

---

---

---

## Principle of Operation

- *A piping restriction is used to develop a pressure drop that is measured and used to infer fluid flow*
  - *Primary Flow Element*
  - *Transmitter (differential pressure)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

101

---

---

---

---

---

---

---

---

## Principle of Operation

- *Bernoulli's equation states that energy is approximately conserved across a constriction in a pipe*
  - *Static energy (pressure head)*
  - *Kinetic energy (velocity head)*
  - *Potential energy (elevation head)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

102

---

---

---

---

---

---

---

---

## Principle of Operation

- *Bernoulli's equation*
  - $P/(\rho \cdot g) + \frac{1}{2}v^2/g + y = \text{constant}$

*P = absolute pressure*  
*ρ = density*  
*g = acceleration of gravity*  
*v = fluid velocity*  
*y = elevation*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Principle of Operation

- *Equation of Continuity*
  - $Q = A \cdot v$

*Q = flow (volumetric)*  
*A = cross-sectional area*  
*v = fluid velocity (average)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Principle of Operation

- *Apply the equation of continuity and Bernoulli's equation for flow in a horizontal pipe*
  - *Acceleration of gravity is constant*
  - *No elevation change*

Spitzer and Boyes, LLC (+1.845.623.1830)  
 Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Principle of Operation

- Apply Bernoulli's equation upstream and downstream of a restriction
- $P_1 + \frac{1}{2} \rho \cdot v_1^2 = P_2 + \frac{1}{2} \rho \cdot v_2^2$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

106

---

---

---

---

---

---

---

---

## Principle of Operation

- Solve for the pressure difference and use the equation of continuity
- $(P_1 - P_2) = \frac{1}{2} \rho \cdot v_2^2 - \frac{1}{2} \rho \cdot v_1^2$   
 $= \frac{1}{2} \rho [v_2^2 - v_1^2]$   
 $= \frac{1}{2} \rho [(A_1/A_2)^2 - 1] \cdot v_1^2$   
 $= \frac{1}{2} \rho [(A_1/A_2)^2 - 1] \cdot Q^2/A_1^2$   
 $= \text{constant} \cdot \rho \cdot Q^2$

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

107

---

---

---

---

---

---

---

---

## Principle of Operation

- $\Delta P = \text{constant} \cdot \rho \cdot Q^2$ 
  - Fluid density affects the measurement
  - Pressure drop is proportional to the square of the flow rate
    - Squared output flowmeter
    - Double the flow... four times the differential

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

108

---

---

---

---

---

---

---

---

## Principle of Operation

- $Q = \text{constant} \cdot (\Delta P/\rho)^{1/2}$ 
  - Fluid density affects the measurement
  - Flow rate is proportional to the square root of the differential pressure produced
    - Often called "square root flowmeter"

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

109

---

---

---

---

---

---

---

---

## Principle of Operation

- $Q$  is proportional to  $1/\rho^{1/2}$
- Fluid density affects the measurement by approximately -1/2% per % density change

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

110

---

---

---

---

---

---

---

---

## Principle of Operation

- Liquid density changes are usually small
- Gas and vapor density changes can be large and may need compensation for accurate flow measurement
  - Flow computers
  - Multivariable differential pressure transmitters

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

111

---

---

---

---

---

---

---

---

## Principle of Operation

### Problem

- *What is the effect on a differential pressure flowmeter when the operating pressure of a gas is increased from 6 to 7 bar?*
- *To simplify calculations, assume that atmospheric pressure is 1 bar abs*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

112

---

---

---

---

---

---

---

---

## Principle of Operation

- *The ratio of the densities is  $(7+1)/(6+1) = 1.14$*
- *The density of the gas increased 14 percent*
- *The flow measurement is proportional to the inverse of the square root of the density which is  $(1/1.14)^{1/2} = 0.94$*
- *The flow measurement will be approximately 6 percent low*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

113

---

---

---

---

---

---

---

---

## Principle of Operation

### Problem

- *Calculate the differential pressures produced at various percentages of full scale flow*
- *Assume 0-100% flow corresponds to 0-100 differential pressure units*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

114

---

---

---

---

---

---

---

---

## Principle of Operation

*Differential pressure as a function of flow*

| <u>Flow</u> | <u><math>\Delta P</math></u> |    |       |
|-------------|------------------------------|----|-------|
| 100 %       | 100                          | dp | units |
| 50 %        | 25                           | “  | “     |
| 20 %        | 4                            | “  | “     |
| 10 %        | 1                            | “  | “     |

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

115

---

---

---

---

---

---

---

---

## Principle of Operation

- *Low flow measurement can be difficult*
  - *For example, only 1/4 of the differential pressure is generated at 50 percent of the full scale flow rate. At 10 percent flow, the signal is only 1 percent of the differential pressure at full scale.*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

116

---

---

---

---

---

---

---

---

## Principle of Operation

**Problem**

- *What is the differential pressure turndown for a 10:1 flow range?*
  - *$0.1^2 = 0.01$ , so at 10% flow the differential pressure is 1/100 of the differential pressure at 100% flow*
  - *The differential pressure turndown is 100:1*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

117

---

---

---

---

---

---

---

---

## Principle of Operation

- *Noise can create problems at low flow rates*
  - *0-10% flow corresponds to 0-1 dp units*
  - *90-100% flow corresponds to 81-100% dp units*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

118

---

---

---

---

---

---

---

---

## Principle of Operation

- *Noise at low flow rates can be reduced by low flow characterization*
  - *Force to zero*
  - *Linear relationship at low flow rates*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

119

---

---

---

---

---

---

---

---

## Principle of Operation

- *Square root relationship generally applies when operating above the Reynolds number constraint for the primary flow element*
  - *Operating below the constraint causes the flow equation to become linear with differential pressure (and viscosity)*
  - *Applying the incorrect equation will result in flow measurement error*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

120

---

---

---

---

---

---

---

---

## Principle of Operation

**Problem**

- *If the Reynolds number at 100% flow is 10,000, what is the turndown for accurate measurement if the primary flow element must operate in the turbulent flow regime?*
  - *10,000/4000, or 2.5:1*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

121

---

---

---

---

---

---

---

---

## Principle of Operation

**Problem**

- *Will the flowmeter operate at 10% flow?*
  - *It will create a differential pressure... however, Reynolds number will be below the constraint, so the flow measurement will not conform to the square root equation (and will not be accurate)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

122

## Differential Pressure Flowmeter Technology

- *Principle of Operation*
- *Primary Flow Elements*
- *Transmitter Designs*
- **Installation**
- *Accessories*
- *Other Flowmeter Technologies*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

141

---

---

---

---

---

---

---

---

## Principle of Operation

- *The quality of measurement is predicated on:*
  - *Proper installation of the primary flow element*
  - *Proper operation of the primary flow element (for example, Reynolds number)*
  - *Accurate measurement of the differential pressure*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

142

---

---

---

---

---

---

---

---

## Installation

- *Fluid Characteristics*
- *Piping and Hydraulics*
- *Impulse Tubing*
- *Electrical*
- *Ambient Conditions*
- *Calibration*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

143

---

---

---

---

---

---

---

---

## Fluid Characteristics

- *Reynolds number within constraints*
- *Fluid must not plug impulse tubing*
  - *Solids*
  - *Purge fluids*
  - *Diaphragm seals (added measurement error)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

144

---

---

---

---

---

---

---

---

## Fluid Characteristics

- *Within accurate flow range*
- *Corrosion and erosion*
  - *Flowmeter*
  - *Exotic (thin) diaphragm materials*
- *Coating*
- *Gas in liquid stream*
- *Immiscible fluids*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

145

---

---

---

---

---

---

---

---

## Piping and Hydraulics

- *For liquids, keep flowmeter full*
  - *Hydraulic design*
    - *Vertical riser preferred*
    - *Avoid inverted U-tube*
  - *Be careful when flowing by gravity*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

146

---

---

---

---

---

---

---

---

## Piping and Hydraulics

- *For gases, avoid accumulation of liquid*
  - *Hydraulic design*
    - *Vertical riser preferred*
    - *Avoid U-tube*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

147

---

---

---

---

---

---

---

---

## Piping and Hydraulics

- *Maintain good velocity profile*
  - *Locate control valve downstream of flowmeter*
  - *Provide adequate straight run*
    - *Locate most straight run upstream*
    - *Install flow conditioner*
- *Use full face gaskets*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

148

---

---

---

---

---

---

---

---

## Piping and Hydraulics

- *Wetted parts compatible with fluid*
- *Pipe quality*
  - *Use smooth round pipe with known inside diameter, wall thickness, and material*
  - *Purchasing the flowmeter and piping section controls pipe quality*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

149

---

---

---

---

---

---

---

---

## Impulse Tubing

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

150

---

---

---

---

---

---

---

---

---

---

---

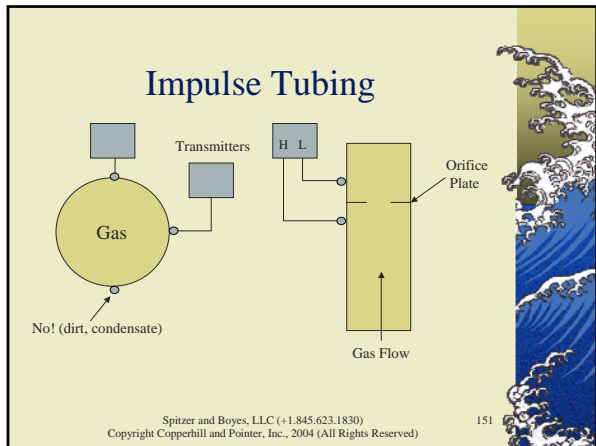

---

---

---

---

---

---

---

---

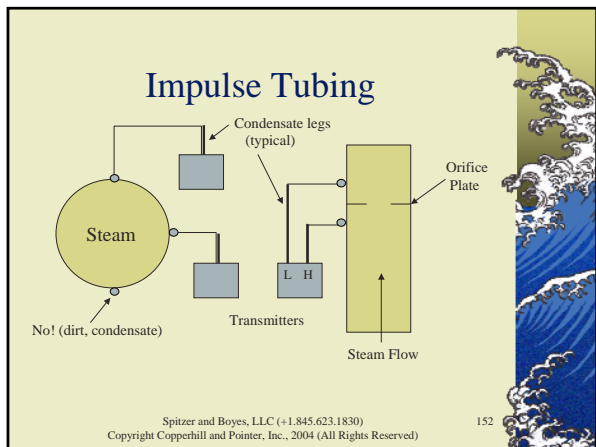

---

---

---

---

---

---

---

---

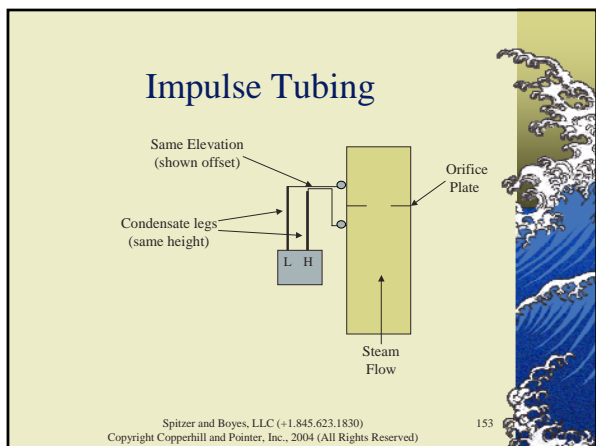

---

---

---

---

---

## Impulse Tubing

- *Liquids*    *avoid collection of gas*
- *Gas*        *avoid collection of liquid*
- *Vapor*      *form condensate legs*
- *Hot*         *locate transmitter far from taps*
- *Cold*        *insulate and/or heat trace*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

154

---

---

---

---

---

---

---

---

## Electrical

- *Wiring*
  - *Two-wire design (no power conduit)*
  - *Fieldbus reduces wiring*
- *Avoid areas of electrical noise*
  - *Radios*
  - *High voltages*
  - *Variable speed drives*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

155

---

---

---

---

---

---

---

---

## Ambient Conditions

- *Outdoor applications (-40 to 80°C)*
  - *Avoid direct sunlight (especially low ranges)*
  - *Support transmitter well*
- *Hazardous locations*
  - *Some designs may be general purpose*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

156

---

---

---

---

---

---

---

---

## Calibration

- *GIGO (garbage in – garbage out)*
- *Entering correct information correctly is critical*
  - *Calibration range*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

157

---

---

---

---

---

---

---

---

## Calibration

- *Internal alignment (digital transmitters)*
  - *Pressure source*
  - *Digital indication in transmitter*
  - *Digital output indication in transmitter*
  - *Analog signal*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

158

---

---

---

---

---

---

---

---

## Calibration

- *Zero in field*
  - *Position effects*
  - *Pressure effects*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

172

---

---

---

---

---

---

---

---

## Differential Pressure Flowmeter

- *Pressure drop is proportional to the square of the fluid flow rate*
  - $\Delta p \propto Q^2$  or  $Q \propto \sqrt{\Delta p}$
  - *Double the flow... four times the differential*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

173

---

---

---

---

---

---

---

---

## Differential Pressure Flowmeter

- *Low flow measurement can be difficult*
  - *For example, only 1/4 of the differential pressure is generated at 50 percent of the full scale flow rate. At 10 percent flow, the signal is only 1 percent of the differential pressure at full scale.*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

174

---

---

---

---

---

---

---

---

## Magnetic Flowmeter

- *Fluid flow through a magnetic field generates a voltage at the electrodes that is proportional to fluid velocity*
  - *Primary Flow Element*
  - *Transmitter*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

175

---

---

---

---

---

---

---

---

## Magnetic Flowmeter

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

176

---

---

---

---

---

---

---

---

## Magnetic Flowmeter

- *Traditional AC excitation was susceptible to noise and drift*
  - *A low voltage signal is generated that is susceptible to noise and cross-talk at the excitation frequency*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

177

---

---

---

---

---

---

---

---

## Magnetic Flowmeter

- Pulsed DC excitation reduces drift by turning the magnet on and off
  - Noise (while the magnet is off) is subtracted from signal and noise (while the magnet is on) to reduce the effects of noise and cross-talk
  - Response time can be compromised

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

178

---

---

---

---

---

---

---

---

## Positive Displacement Flowmeter

- Positive displacement flowmeters measure flow by repeatedly entrapping fluid within the flowmeter
  - Moving parts with tight tolerances
  - Bearings
  - Many shapes

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

179

---

---

---

---

---

---

---

---

## Target Flowmeter

- Target flowmeters determine flow by measuring the force exerted on a body (target) suspended in the flow stream

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

180

---

---

---

---

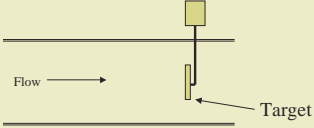

---

---

---

---

## Target Flowmeter

Flow → Target

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

181

---

---

---

---

---

---

---

---

## Thermal Flowmeter

- *Thermal flowmeters use the thermal properties of the fluid to measure flow*
  - *Hot Wire Anemometer*
  - *Thermal Profile*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

182

---

---

---

---

---

---

---

---

## Thermal Flowmeter Hot Wire Anemometer

- *Hot wire anemometers determine flow by measuring the amount of energy needed to heat a probe whose heat loss changes with flow rate*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

183

---

---

---

---

---

---

---

---

## Thermal Flowmeter Hot Wire Anemometer

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

184

---

---

---

---

---

---

---

---

## Thermal Flowmeter Thermal Profile

- *Thermal profile flowmeters determine flow by measuring the temperature difference that results in a heated tube when the fluid transfers heat from the upstream portion to the downstream portion of the flowmeter*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

185

---

---

---

---

---

---

---

---

## Thermal Flowmeter Thermal Profile

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

186

---

---

---

---

---

---

---

---

## Turbine Flowmeter

- *Fluid flow causes a rotor to spin whereby the rotor speed is proportional to fluid velocity*
  - *Primary Flow Element*
  - *Transmitter*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

187

---

---

---

---

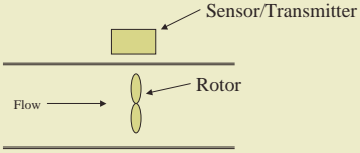

---

---

---

---

## Turbine Flowmeter

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

188

---

---

---

---

---

---

---

---

## Turbine Flowmeter

- *The sensor detects the rotor blades*
- *The frequency of the rotor blades passing the sensor is proportional to fluid velocity*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

189

---

---

---

---

---

---

---

---

## Ultrasonic - Doppler

- *Doppler ultrasonic flowmeters reflect ultrasonic energy from particles, bubbles and/or eddies flowing in the fluid*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

190

---

---

---

---

---

---

---

---

## Ultrasonic - Doppler

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

191

---

---

---

---

---

---

---

---

## Ultrasonic - Doppler

- *Under no flow conditions, the frequencies of the ultrasonic beam and its reflection are the same*
- *With flow in the pipe, the difference between the frequency of the beam and its reflection increases proportional to fluid velocity*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

192

---

---

---

---

---

---

---

---

## Ultrasonic - Transit Time

- *Transit time (time-of-flight) ultrasonic flowmeters alternately transmit ultrasonic energy into the fluid in the direction and against the direction of flow*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Flowmeter Performance

- Accuracy is the ability of the flowmeter to produce a measurement that corresponds to its characteristic curve

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

205

---

---

---

---

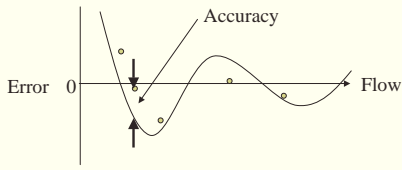

---

---

---

---

## Flowmeter Performance

The graph plots Error on the vertical axis and Flow on the horizontal axis. A horizontal line at Error = 0 is labeled '0'. A curve labeled 'Accuracy' oscillates around the zero line. Several data points are plotted as small circles, with vertical arrows indicating the deviation of each point from the zero error line.

---

---

---

---

---

---

---

---

## Flowmeter Performance

- Repeatability is the ability of the flowmeter to reproduce a measurement each time a set of conditions is repeated

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

219

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

### Performance Statements

- Performance expressed as a percent of calibrated span is similar to full scale and meter capacity statements where the absolute error is a percentage of the calibrated span

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

### Performance Statements

- 1% of calibrated span performance at different flow rates with a 0-100 unit flow range (URL=400, calibrated span=200)
  - 100% flow  $\rightarrow 0.01 \cdot 200$  2 units = 2% rate
  - 50% flow  $\rightarrow 0.01 \cdot 200$  2 units = 4% rate
  - 25% flow  $\rightarrow 0.01 \cdot 200$  2 units = 8% rate
  - 10% flow  $\rightarrow 0.01 \cdot 200$  2 units = 20% rate

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

### Performance Statements

- *A calibrated span statement becomes a full scale statement when the instrument is calibrated to full scale*
- *A calibrated span statement becomes a meter capacity statement when the instrument is calibrated at URL*

Spitzer and Boyes, LLC (+1.845.623.1830) 224  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

### Performance Statements

- *Performance specified as a percent of rate, percent of full scale, percent of meter capacity, and percent of calibrated span are different*

Spitzer and Boyes, LLC (+1.845.623.1830) 225  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)

---

---

---

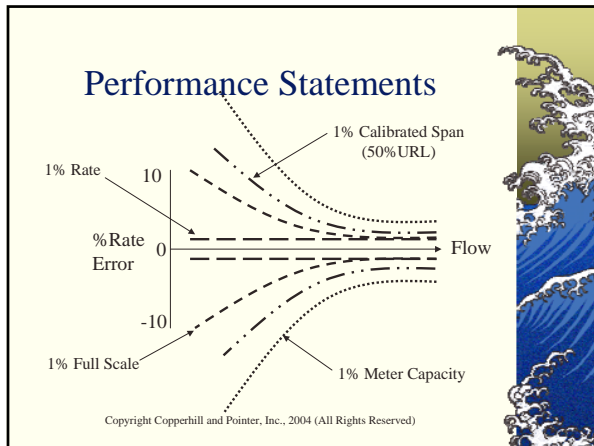

---

---

---

---

---

---

---

---

---

---

---

---

---

- ### Performance Statements
- *Different and multiple performance statements may apply*
    - *0.05% full scale typical transmitter*
    - *0.10% full scale low range transmitter*
    - *0.50% rate 50-100% full scale*
    - *0.25% full scale 10-50% full scale*
- Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved) 227

---

---

---

---

---

---

---

---

- ### Performance Statements
- *Performance statements apply over a range of operation*
  - *Turndown is the ratio of the maximum flow that the flowmeter will measure within the stated accuracy to the minimum flow that can be measured within the stated accuracy*
- Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved) 228

---

---

---

---

---

---

---

---

## Performance Statements

- *Performance statements can be manipulated because their meaning may not be clearly understood*
- *Technical assistance may be needed to analyze the statements*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Flowmeter Performance

- *Flowmeter Performance*
- *Performance Statements*
- **Reference Performance**
- *Actual Performance*
- *Supplier Claims*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Reference Performance

- *Reference performance is the quality of measurement at a nominal set of operating conditions, such as:*
  - *Water at 20°C in ambient conditions of 20°C and 50 percent relative humidity*
  - *Long straight run*
  - *Pulse output*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

---

---

---

---

---

---

---

---

## Reference Performance

- *In the context of the industrial world, reference performance reflects performance under controlled laboratory conditions*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

232

---

---

---

---

---

---

---

---

## Reference Performance

- *Performance of the primary flow element and the transmitter must be taken into account to determine performance of flowmeter system*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

233

---

---

---

---

---

---

---

---

## Reference Performance

- *Hypothetical primary flow element*
  - *1% rate  $R_d > 4000$  and  $Q > 10\% FS$*
  - *Otherwise undefined*
  - *Assumes correct design, construction, installation, calibration, and operation*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

234

---

---

---

---

---

---

---

---

## Reference Performance

- *Hypothetical differential pressure transmitter*
  - *0.10% calibrated span*
    - *Calibrated for 0-100 units*
    - *Factory calibrated at upper range limit (URL) of 400 units*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

235

---

---

---

---

---

---

---

---

## Reference Performance

### Problem

- *What is the measurement error associated with the performance of the hypothetical differential pressure transmitter?*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

236

---

---

---

---

---

---

---

---

## Reference Performance

- *The calibrated span is 400, so the differential pressure measurement error is 0.10% of 400, or 0.4 units at all differential pressures*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

237

---

---

---

---

---

---

---

---

## Reference Performance

### Problem

- What is the flow measurement error associated with the performance of the hypothetical differential pressure transmitter?

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

238

---

---

---

---

---

---

---

---

---

---

---

---

---

---

## Reference Performance

### Problem

- What is the flow measurement error associated with the performance of the flow measurement system (primary flow element and differential pressure transmitter)?

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

240

---

---

---

---

---

---

---

---

## Reference Performance

- *System performance is the statistical combination of the errors associated with the components (primary flow element and transmitter)*
- *System performance is not the mathematical sum of the individual errors*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

241

---

---

---

---

---

---

---

---

## Flowmeter Performance

- *Flowmeter Performance*
- *Performance Statements*
- *Reference Performance*
- *Actual Performance*
- *Supplier Claims*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

242

---

---

---

---

---

---

---

---

## Actual Performance

- *Operating Effects*
  - *Ambient conditions*
    - *Humidity*
    - *Precipitation*
    - *Temperature*
    - *Pressure*
    - *Direct sunlight*
  - *Mounting Orientation*
  - *Stability (Drift)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

243

---

---

---

---

---

---

---

---

## Actual Performance

- *Ambient Humidity and Precipitation*
  - *Many flowmeters are rated to 10-90% relative humidity (non-condensing)*
  - *Outdoor locations are subject to 100% relative humidity and precipitation in various forms*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

244

---

---

---

---

---

---

---

---

## Actual Performance

- *Ambient Temperature and Pressure*
  - *Information available to evaluate actual performance*
    - *Temperature effect*
    - *Pressure effect*
  - *Effects can be significant, even though the numbers seem small*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

245

---

---

---

---

---

---

---

---

## Actual Performance

**Example**

- *The error (at 25 percent of scale and a 0°C ambient) associated with a temperature effect of 0.01% full scale per °C can be calculated as:*
  - *0.01\*(20-0)/25, or 0.80% rate*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

246

---

---

---

---

---

---

---

---

**Actual Performance**

- *Reference accuracy performance statements are often discussed*
- *Operating effects, such as temperature and pressure effects are often only mentioned with prompting*
  - *Progressive disclosure*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved) 247

---

---

---

---

---

---

---

---

**Actual Performance**

- *Ambient Direct Sunlight*
  - *Can cause temporary calibration shift*
    - *Low range transmitters*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved) 248

---

---

---

---

---

---

---

---

**Actual Performance**

- *Mounting Orientation*
  - *Bench calibration vs. field calibration*
    - *Up to 5 mbar (2 inch WC) shift*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved) 249

---

---

---

---

---

---

---

---

## Actual Performance

- *Stability*
  - *Drift over time*
    - *Usually faster at beginning of period*
  - *Specifications difficult to compare*
    - *Different ways over different periods of time*

250

---

---

---

---

---

---

---

---

## Actual Performance

- *Combining Operating Effects*

$$\text{Estimated Error} = \sqrt{\text{error}_1^2 + \text{error}_2^2 + \text{error}_3^2 + \dots}$$

*where the errors in like units*

251

---

---

---

---

---

---

---

---

## Flowmeter Performance

- *Flowmeter Performance*
- *Performance Statements*
- *Reference Performance*
- *Actual Performance*
- *Supplier Claims*

252

---

---

---

---

---

---

---

---

## Supplier Claims

- *High Rangedown*
  - *Rangedown is the ratio of the maximum to minimum full scale ranges to which the differential pressure transmitter can be calibrated*
  - *Sometimes called turndown*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

253

---

---

---

---

---

---

---

---

## Supplier Claims

**Example**

- *The rangedown a differential pressure transmitter that can be calibrated from 0-12.5 mbar to 0-1000 mbar is:*
  - *1000/12.5, or 80:1*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

254

---

---

---

---

---

---

---

---

## Supplier Claims

- *The accuracy for these ranges is:*
  - *0-12.5 mbar      0.425% of set span*
  - *0-1000 mbar      0.075% of set span*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

255

---

---

---

---

---

---

---

---

## Supplier Claims

- 0-1000 mbar (0.075% of set span)

| <u>Flow</u> | <u>Differential Pressure</u> | <u>Error</u> | <u>Flow Error</u> |
|-------------|------------------------------|--------------|-------------------|
| 100%        | 1000 mbar                    | 0.75 mbar    | 0.04% rate        |
| 50%         | 250 mbar                     | 0.75 mbar    | 0.15% rate        |
| 20%         | 40 mbar                      | 0.75 mbar    | 0.94% rate        |

---

## Supplier Claims

- *High Turndown*
  - *Turndown is the ratio of the maximum to minimum differential pressures that the differential pressure transmitter can measure within the stated accuracy*

Spitzer and Boyes, LLC (+1.845.623.1830)

---

---

---

---

---

---

---

---

## Supplier Claims

- *High Accuracy*
  - *High accuracy claims often refer to high flow rates at reference conditions and imply high accuracy at all flow rates*

Spitzer and Boyes, LLC (+1.845.623.1830)

261

---

---

---

---

---

---

---

---

## Supplier Claims

- *High Accuracy*
  - *Often disguised by omission*
    - *“0.075% accuracy” (omits rate, full scale, meter capacity, calibrated span)*
  - *Reducing full scale can degrade accuracy of some transmitters*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

262

---

---

---

---

---

---

---

---

## Supplier Claims

- *High Accuracy*
  - *Accuracy generally does not take operating effects into account*
    - *Temperature effect*
    - *Pressure effect*
    - *Other effects*
      - *Humidity, precipitation, sunlight, stability*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

263

---

---

---

---

---

---

---

---

## Supplier Claims

- *Reduced Calibration*
  - *Improved stability (drift) specifications*
    - *Operating effects can be larger than stability*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

264

---

---

---

---

---

---

---

---

## Seminar Outline

- *Introduction*
- *Fluid Flow Fundamentals*
- *Flowmeter Technology*
- *Flowmeter Performance*
- ***Consumer Guide***

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

265

---

---

---

---

---

---

---

---

## Consumer Guide

### *User Equipment Selection Process*

- *Learn about the technology*
- *Find suitable vendors*
- *Obtain specifications*
- *Organize specifications*
- *Evaluate specifications*
- *Select equipment*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

266

---

---

---

---

---

---

---

---

## Consumer Guide

### *User Equipment Selection Process*

- *Performing this process takes time and therefore costs money*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

267

---

---

---

---

---

---

---

---

## Consumer Guide

### *User Equipment Selection Process*

- *Haphazard implementation with limited knowledge of alternatives does not necessarily lead to a good equipment selection*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

268

---

---

---

---

---

---

---

---

## Consumer Guide

### *Guide Provides First Four Items*

- *Learn about the technology*
- *Find suitable vendors*
- *Obtain specifications*
- *Organize specifications*
- *Evaluate specifications*
- *Select equipment*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

269

---

---

---

---

---

---

---

---

## Consumer Guide

### *Guide Provides First Four Items*

- *Information focused on technology*
- *Comprehensive lists of suppliers and equipment*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

270

---

---

---

---

---

---

---

---

**Consumer Guide**

*Guide Provides First Four Items*

- **Significant specifications**
- **Lists of equipment organized to facilitate evaluation**

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

271

---

---

---

---

---

---

---

---

**Consumer Guide**

*User Equipment Selection Process*

- *By providing the first four items, the Consumer Guides:*
  - *make technical evaluation and equipment selection easier, more comprehensive, and more efficient*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

272

---

---

---

---

---

---

---

---

**Consumer Guide**

*User Equipment Selection Process*

- *By providing the first four items, the Consumer Guides:*
  - *allow selection from a larger number of suppliers*
  - *simplifies the overall selection process*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

273

---

---

---

---

---

---

---

---

## Consumer Guide

- **Supplier Data and Analysis**
- **Attachments**
  - *Flowmeter categories*
  - *Availability of selected features*
  - *Models grouped by performance*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

274

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- **Ambient Limits**
  - *Temperature (-20 to 80°C typical)*
  - *Humidity, precipitation*
  - *NEMA 4X, IP67 (IP68 available)*
  - *Hazardous locations*
    - *Non-incendive, explosion-proof, intrinsically safe*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

275

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- **Process Operating Limits**
  - *Pressure limit*
  - *Temperature limit (100-149°C)*
  - *Composition*
    - *Limited by materials of construction*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

276

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- *Materials of Construction*
  - *Wetted parts and materials similar for most major suppliers*
    - *Specials (e.g., gold diaphragm for hydrogen)*
  - *Some designs have O-rings/gaskets*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

277

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- *Transmitter*
  - *Two-wire loop powered device*
    - *HART, Fieldbus*
  - *Alarms, totalization*
  - *Multivariable*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

278

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- *Reference Performance*
  - *Reference accuracy usually includes the effects of linearity, hysteresis, and repeatability*
  - *Performance may be degraded at smaller spans*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

279

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- *Operating Effects*
  - *Ambient Temperature*
    - *Assume 25°C for calculations*
  - *Process Pressure*
    - *Assume 7 bar for calculations*
  - *Transmitter Stability*
    - *Assume 12 months (1 year)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

280

---

---

---

---

---

---

---

---

## Supplier Data and Analysis

- *Operating Effects*
  - *Power Supply*
    - *Typically 0.005% span per volt*
    - *Neglected in calculations*
  - *Mounting position effect*
    - *Neglected in calculations*
  - *Humidity, precipitation*
    - *Neglected in calculations*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

281

---

---

---

---

---

---

---

---

## Consumer Guide

- *Supplier Data and Analysis*
- **Attachments**
  - *Availability of selected features*
  - *Models grouped by performance*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

282

---

---

---

---

---

---

---

---

## Availability of Selected Features

- *Suppliers (12 major manufacturers) with factories in:*
  - 9 USA
  - 5 China
  - 4 Japan
  - 3 Germany
  - 1 Brazil, France, India, Italy, Singapore

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

283

---

---

---

---

---

---

---

---

## Availability of Selected Features

- *Approvals*
  - *Hazardous Locations*
  - *Safety*
  - *Housing (NEMA/IP rating)*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

284

---

---

---

---

---

---

---

---

## Availability of Selected Features

- *Ambient and wetted part temperature limits*
  - *Ambient may be derated in high ambient temperatures*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Painter, Inc., 2004 (All Rights Reserved)

285

---

---

---

---

---

---

---

---

## Availability of Selected Features

- *Communications*
  - *HART*
  - *Foundation Fieldbus*
  - *Profibus*

Spitzer and Boyes, LLC (+1.845.623.1830)  
Copyright Copperhill and Pointer, Inc., 2004 (All Rights Reserved)
